Moving School Improvement Policy and Practice Forward:

Common Core Standards for a Developing a Unified & Comprehensive System to Address Barriers to Learning & Teaching and Re-engage Disconnected Students

Today we just have time to highlight the importance of:

I. Why a Unified & Comprehensive System of Learning Supports is Imperative for School Improvement Policy and Student and Teacher Well-Being?

II. Offering Prototype Frameworks for New Directions for Student and Learning Supports

We will illustrate this second matter by showing:
> an expanded school improvement policy framework
> reframing student and learning supports for schools
> outlining common core standards for a learning supports component

Why is a system of learning supports imperative for school improvement policy and practice?

Presentation by Howard Adelman and Linda Taylor, co-directors of the Center at UCLA.
Contact info: Dept. of Psychology, UCLA, Box 951563, Los Angeles, CA 90095-1563; phone (310) 825-3634.
Emails: Ltaylor@ucla.edu  adelman@psych.ucla.edu  Smhp@ucla.edu

For an overview of resources available at no cost from the Center, see the Center website: http://smhp.psych.ucla.edu

Note: Many of the handouts from this presentation are included on the Center website in both powerpoint & PDF formats.
Developing a System to Address Barriers & Re-engage Students in Classroom Instruction

Four Fundamental and Interrelated Concerns

Framing Interventions to Address Barriers to Learning and Teaching into a Comprehensive System of Interventions

Policy Revision

Developing Systemic Change Mechanisms for Effective Implementation, Sustainability, and Replication to Scale

Rethinking Organizational and Operational Infrastructure

Additionally, because of the overemphasis on using extrinsic reinforcers in all aspects of efforts to improve schools, we find it essential to re-introduce a focus on intrinsic motivation.
I. Why is a System of Learning Supports Imperative for School Improvement?

Some Major Concerns

- High Student Dropout Rates
- High Teacher Dropout Rates
- Continuing Achievement Gap
- So Many Schools Designated as Low Performing
- High Stakes Testing Taking its Toll on Students
- Plateau Effect

*Teachers shouldn’t be expected to do it alone!*
The imperative is well-stated by the Carnegie Task Force on Education:

_School systems are not responsible for meeting every need of their students._

_But . . ._

_when the need directly affects learning,_
_when the school must meet the challenge._

The Challenge: _Doing More with Less_

_We all know that sparse resources_
_(people, budget, time, etc.)_
_are a constant challenge._
The Challenge:
Addressing All Students; Addressing Barriers to Learning and Teaching

Range of Learners
(categorized in terms of their response to academic instruction at any given point in time)

- Motivationally ready & able
- Not very motivated/ lacking prerequisite knowledge & skills/ different learning rates & styles/ minor vulnerabilities
- Avoidant/ very deficient in current capabilities/ has a disability/ major health problems

Instructional Component
Classroom Teaching + Enrichment Activity
(High Standards)

Desired Outcomes (High Expect. & Accountability)

*Examples of Risk-Producing Conditions that Can be Barriers to Learning

Environmental Conditions**
- Neighborhood
  > extreme economic deprivation
  > community disorganization, including high levels of mobility and crime
  > violence, drugs, etc.
  > gangs
  > racial and ethnic conflicts

- Family
  > chronic poverty
  > conflict/disruptions/violence
  > substance abuse
  > modeling problem behavior
  > abusive caretaking
  > inadequate provision for quality child care
  > problems stemming from minority, immigrant, homeless, foster care, juvenile offender status

- School and Peers
  > enrollment and attendance hurdles
  > poor quality school
  > negative encounters with teachers
  > negative encounters with peers &/or inappropriate peer models

- Individual
  > medical problems
  > low birth weight/ neurodevelopmental delay
  > psychophysiological problems
  > difficult temperament & adjustment problems
  > inadequate nutrition
  > English is a second language
  > learning and mental disorders

**A reciprocal determinist view of behavior recognizes the interplay of environment and person variables.

* A reciprocal determinist view of behavior recognizes the interplay of environment and person variables.

For more on this and for references to relevant literature, see:
Current Approach to Addressing Barriers at Schools

What we see around the country

**Talk about fragmented!!!**

What does this mean for systemic change?

Current Situation is that the efforts to provide supports to address barriers are marginalized in policy and practice.

This leads to

- Fragmentation

- Poor Cost-Effectiveness (up to 25% of a school budget used in too limited and often redundant ways)

- Counterproductive Competition for Sparse Resources (among school support staff and with community-based professionals who link with schools)
Why the Marginalization?

Graphically Clarifying the Policy Problem

This is how school improvement policy & practice addresses barriers to learning and teaching

Direct Facilitation of Learning & Development

Safe Schools & Student & Family Assistance

Besides offering a small amount of school-owned student "support" services, schools outreach to the community to add a few school-based/linked services.

Governance and Resource Management
II. Expanding School Improvement Policy & Reframing Student and Learning Supports

Clearly, there are some student and learning supports; what’s missing is a dedicated, unified, and comprehensive component directly focused on:

(1) addressing barriers to learning & teaching

AND

(2) re-engaging students who have become disconnected from classroom instruction & schools
The need is to move from the prevailing two-component framework to a three-component framework in order to develop a Unified & Comprehensive System of Supports:

**Direct Facilitation of Learning (Instructional Component)**

**Addressing Barriers to Learning/Teaching (Enabling or Learning Supports Component) – an umbrella for ending marginalization by unifying the many fragmented efforts and evolving a comprehensive approach)**

**Governance and Resource Management (Management Component)**

*Examples of Initiatives, programs and services*

- positive behavioral supports
- programs for safe and drug free schools
- full service community schools & Family Resource Ctrs
- Safe Schools/Healthy Students
- School Based Health Center movement
- Coordinated School Health Program
- bi-lingual, cultural, and other diversity programs
- re-engaging disengaged students
- compensatory education programs
- special education programs
- mandates stemming from the No Child Left Behind Act & other federal programs
- And many more activities by student support staff
Building a Learning Supports System

• Learning Supports are defined as the resources, strategies, and practices that support physical, social, emotional and intellectual development and well-being to enable all students to have an equal opportunity for success at school.

• To enable effective use of learning supports, school and community resources are unified in a learning supports component and fully integrated with instructional efforts and interventions and professional development.

• A learning supports component is deployed in classrooms and school-wide to address barriers to learning and teaching and re-engage disconnected students.
Some specific aids from work across the country:

Brief description of the prototype developed by our Center –
>Toward Next Steps in School Improvement: Addressing Barriers to Learning and Teaching –
http://smhp.psych.ucla.edu/pdfdocs/systemic/towardnextstep.pdf

>Design for a Comprehensive Learning Supports System as adapted by the Louisiana Department of Education at

>Design for a Comprehensive System of Learning Supports as adapted by the Gainesville City Schools (GA) and the summary of the case study on the district’s work developed by the Education Development Center (EDC)
http://smhp.psych.ucla.edu/aasa/aasagainesville.pdf

>Handbook developed by our Center as part of the collaboration with Scholastic http://smhp.psych.ucla.edu/rebuild/rebuildingtoc.htm
also see the online leadership institute modules –
http://rebuildingforlearning.scholastic.com/

>Brochures describing the systems developed by various districts and state departments – http://smhp.psych.ucla.edu/toolkita1a.htm

>Rebuilding Toolkit – guides, materials, tools and other resources
http://smhp.psych.ucla.edu/summit2002/resourceaids.htm
Here is a prototype for a unified and comprehensive system of interventions that these pioneering efforts have adopted/adapted
Prototype of an Enabling or Learning Supports Component to Address Barriers to Learning and Re-engage Students in Classroom Instruction

Range of Learners
(categorized in terms of their response to academic instruction at any given point in time)

Motivationally ready & able

Not very motivated/ lacking prerequisite knowledge & skills/ different learning rates & styles/ minor vulnerabilities

Avoidant/ very deficient in current capabilities/ has a disability/ major health problems

No barriers

Enabling/ Learning Supports Component
(1) Addressing interfering factors
(2) Re-engaging students in classroom instruction

Instructional Component
Classroom Teaching +
Enrichment Activity (High Standards)

Desired Outcomes
(High Expect. & Accountability)

*In some places, an Enabling Component is called a Learning Supports Component. Whatever it is called, the component is to be developed as a unified and comprehensive system of learning supports at the school site.
A Unified, Comprehensive, & Systemic Learning Supports Component is Standards-Based and Accountability-Driven

The intervention framework consists of

• a full *continuum* of interventions
  &

• an Organized Set of *Content* Arenas
Prototype for Clarifying Levels of Intervention Continuum:*  
Interconnected Subsystems for Meeting the Needs of All Students

**One Key Facet of a Unified and Comprehensive Framework**

**School Resources**  (facilities, stakeholders, programs, services)

Examples:
- General health education
- Social and emotional learning programs
- Recreation programs
- Enrichment programs
- Support for transitions
- Conflict resolution
- Home involvement
- Drug and alcohol education

Subsystem for Promoting Healthy Development & Preventing Problems
primary prevention – includes universal interventions
(low end need/low cost per individual programs)

Subsystem of Early Intervention
early-after-onset – includes selective & indicated interventions
(moderate need, moderate cost per individual)

Subsystem of Care
treatment/indicated interventions for severe and chronic problems
(High end need/high cost per individual programs)

**Community Resources**  (facilities, stakeholders, programs, services)

Examples:
- Recreation & Enrichment
- Public health & safety programs
- Prenatal care
- Home visiting programs
- Immunizations
- Child abuse education
- Internships & community service programs
- Economic development

- Early identification to treat health problems
- Monitoring health problems
- Short-term counseling
- Foster placement/group homes
- Family support
- Shelter, food, clothing
- Job programs

- Emergency/crisis treatment
- Family preservation
- Long-term therapy
- Probation/incarceration
- Disabilities programs
- Hospitalization
- Drug treatment

Systemic collaboration is essential to establish interprogram connections on a daily basis and over time to ensure seamless intervention within each system and among systems for promoting healthy development and preventing problems, systems of early intervention, and systems of care.

Such collaboration involves horizontal and vertical restructuring of programs and services
(a) within jurisdictions, school districts, and community agencies (e.g., among departments, divisions, units, schools, clusters of schools)
(b) between jurisdictions, school and community agencies, public and private sectors; among schools; among community agencies

---

*Various venues, concepts, and initiatives permeate this continuum of intervention systems. For example, venues such as day care and preschools, concepts such as social and emotional learning and development, and initiatives such as positive behavior support, response to intervention, and coordinated school health. Also, a considerable variety of staff are involved. Finally, note that this illustration of an essential continuum of intervention systems differs in significant ways from the three tier pyramid that is widely referred to in discussing universal, selective, and indicated interventions.*
Prototype Categories of *Basic Content Arenas* for Learning Supports Intervention

Note: All categorical programs can be integrated into these six content arenas. Examples of initiatives, programs, and services that can be unified into a system of learning supports include positive behavioral supports, programs for safe and drug free schools, programs for social and emotional development and learning, full service community schools and family resource and school based health centers, Safe Schools/Healthy Students projects, CDC’s Coordinated School Health Program, bi-lingual, cultural, and other diversity programs, compensatory education programs, special education programs, mandates stemming from the No Child Left Behind Act, and many more.

Major Examples of Activity in Each of the Six Basic Content Arenas
Enhancing Regular Classroom Strategies to Enable Learning

A key to personalizing learning and stemming the tide of out-of-class referrals is to “open classroom doors” to bring learning supports into the classroom. This requires in-class collaboration with student support staff and other teachers, as well as training volunteers to assist with students-in-need.

Learning supports in the classroom are designed to enable student learning by assisting, supporting, and enhancing the capability of teachers to (a) prevent problems, (b) intervene as soon after problems arise, (c) enhance intrinsic motivation for learning, and (d) re-engage students who have become disengaged from classroom learning. Learning supports are designed to increasingly enable teachers to personalize instruction for all students, add special assistance in the context of implementing “Response to Intervention,” and provide a greater range of accommodations and learning options.

Examples of Classroom-Based Learning Supports Essential to Personalizing Learning

- Redesigning classroom approaches to enhance teacher capability to prevent and handle problems and reduce the need for out-of-class referrals
  > Personalized instruction; special assistance as necessary
  > Developing small group and independent learning options
  > Reducing negative interactions and over-reliance on social control
  > Expanding the range of curricular and instructional options and choices
  > Systematic use of “prereferral” interventions

- Enhancing and personalizing professional development
  > Creating a learning community for teachers
  > Ensuring opportunities to learn through co-teaching, team teaching, mentoring
  > Teaching intrinsic motivation concepts and their application to schooling

- Curricular enrichment and adjunct programs
  > Varied enrichment activities that are not tied to reinforcement schedules
  > Visiting scholars from the community

- Classroom and school-wide approaches used to create and maintain a caring and supportive climate with a specific focus on enhancing feelings of competence, self-determination, and relatedness to others at school and reducing threats to such feelings

In addition to the self-study survey and Quick Finds related to this arena, see the continuing education modules on

> Personalizing Learning at [http://smhp.psych.ucla.edu/pdfdocs/personalizeI.pdf](http://smhp.psych.ucla.edu/pdfdocs/personalizeI.pdf)
> Engaging and Re-engaging Students and Families at [http://smhp.psych.ucla.edu/pdfdocs/engageI.pdf](http://smhp.psych.ucla.edu/pdfdocs/engageI.pdf)
Supports for Transitions

Supporting transitions involves a range of interventions that address changes can be disruptive to students, families, and teachers. In the classroom and school-wide (and sometimes at the district level), such supports are designed to (a) enhance successful transitions, (b) prevent transition problems, (c) use transitions to enhance acceptance and reduce alienation, and (d) use transitions to increase positive attitudes/motivation toward school and learning.

Examples of Supports for Transitions

- Welcoming and social support programs for newcomers
  > Welcoming signs, materials, and initial receptions
  > Peer buddy programs for students, families, staff, volunteers

- Daily transition programs for
  > Before school, breaks, lunch, afterschool

- Articulation programs
  > Grade to grade (new classrooms, new teachers)
  > Elementary to Middle School; Middle to High School
  > In and out of special education programs

- Summer or intersession programs
  > Catch-up, recreation, and enrichment programs

- School-to-career/higher education
  > Counseling, pathway, and mentor programs

- Broad involvement of stakeholders in planning for transitions
  > Students, staff, home, police, faith groups, recreation, business, higher educ.

- Staff/stakeholder development for planning transition programs/activities

In addition to the self-study survey and Quick Finds related to this arena, see
> Transitions: Turning Risks into Opportunities for Student Support
http://smhp.psych.ucla.edu/pdftdocs/transitions/transitions.pdf
Home Involvement and Engagement

While policy calls for parent involvement, the reality is that many students are cared for by grandparents, aunts, siblings, and foster families. Also, because of past experiences, many care-providers are not motivated to connect with the school, and some are so angry with schools that they are belligerent when contacted.

Learning supports aim to develop a full range of interventions designed to assist and then engage and re-engage key home stakeholders. In the classroom and school-wide (and sometimes at the district level), such supports are designed to (a) strengthen the home situation, (b) enhance home involvement in and capability for problem solving, (c) increase home support for student development and learning, and (d) enlist the home in strengthening school and community.

Examples of Home Involvement and Engagement

- Addressing specific support and learning needs of family
  - Facilitating open-access to support programs for those in the home to assist them in addressing basic survival needs and obligations to the children
  - Adult education classes to enhance literacy, job skills, English-as-a-second language, citizenship preparation

- Improving mechanisms for communication and connecting school and home
  - Opportunities at school for family networking and mutual support, learning, recreation, enrichment, and for family members to receive special assistance and to volunteer to help
  - Phone calls from teacher and other staff with good news
  - Frequent and balanced conferences (student-led when feasible)
  - Outreach to attract hard-to-reach families (including student dropouts)

- Involving homes in student decision making
  - Families prepared for involvement in program planning and problem-solving

- Enhancing home support for learning and development
  - Family literacy, family homework projects, family field trips

- Recruiting families to strengthen school and community
  - Volunteers to welcome and support new families and help in various capacities
  - Families prepared for involvement in school governance

- Staff/stakeholder development to broaden awareness of and plan programs to enhance opportunities for home involvement

In addition to the self-study survey and Quick Finds related to this arena, see

- Parent and Home Involvement in Schools
- Enhancing Home Involvement to Address Barriers to Learning: A Collaborative Process
  [http://smhp.psych.ucla.edu/pdfdocs/homeinv.pdf](http://smhp.psych.ucla.edu/pdfdocs/homeinv.pdf)
Community Involvement and Engagement

Most schools are reaching out to a few community partners. Learning supports aims to fill critical systemic gaps by weaving in a wider range of community resources to work collaboratively on mutual concerns related to strengthening students, schools, families, and neighborhoods. For schools and the district, this requires programs and systems to increase and strengthen outreach to build linkages and collaborations to a wide range of entities, including enhanced use of volunteers and agencies.

Examples of Community Involvement and Engagement

• Planning and implementing outreach to recruit a wide range of community resources
  > Community resources such as public and private agencies; colleges/universities; local residents; artists and cultural institutions, businesses and professional organizations; service, volunteer, and faith-based organizations
  > Community policy and decision makers

• Systems to recruit, screen, prepare, and maintain community resource involvement
  > Mechanisms to orient and welcome
  > Mechanisms to enhance the volunteer and mentor pools,
  > Mechanisms to maintain current involvements; enhance sense of comm.

• Reaching out to students and families who don't come to school regularly – including truants and dropouts

• Connecting school and community efforts to promote child and youth development and a sense of community

• Capacity building to enhance community involvement and support
  > Policies/mechanisms to enhance & sustain school-community involvement
  > Staff/stakeholder development on the value of community involvement
  > Social marketing

In addition to the self-study survey and Quick Finds related to this arena, see
>Community Outreach: School-Community Resources to Address Barriers to Learning
  http://smhp.psych.ucla.edu/qf/Commout_tt/communityfull.pdf
>Fostering School, Family and Community Involvement
Crisis Response and Prevention

The broad category of crisis assistance and prevention stresses not only effective emergency response and aftermath help, but a major emphasis on prevention that fits nicely with concerns for creating a positive and supportive school climate. A general focus on crisis prevention encompasses bullying and violence prevention and other efforts to curtail problems and minimize the need for discipline and suspensions. The supports in this arena require integrated classroom, school-wide, and district programs and systems that (a) respond to crises, (b) minimize the impact of crises, (c) where feasible, prevent school and personal crises and trauma, (d) counter the impact of out-of-school traumatic events. and (e) create a caring and safe learning environment.

Examples of Crisis Response and Prevention

• Ensuring there is a well-trained school-focused Crisis Team that
  > Maintains an integrated response plan
  > Takes leadership for developing prevention programs

• Providing immediate assistance in emergencies so students can resume learning

• Providing follow-up care as necessary
  > Brief and longer-term monitoring

• Mobilizing staff, students, and families to anticipate response plans and recovery efforts

• Maintaining a focus on creating a caring and safe learning environment
  > Developing systems to promote healthy development and prevent problems
  > Developing general crisis prevention strategies that encompass bullying, harassment, violence prevention, and other efforts to curtail problems and minimize the need for discipline and suspensions

• Working with neighborhood schools and the local community to integrate planning for response and prevention

• Staff/stakeholder development focusing on the role and responsibility of all in promoting a caring and safe environment

In addition to the self-study survey and Quick Finds related to this arena, see
  > Responding to Crisis at a School at http://smhp.psych.ucla.edu/pdfdocs/crisis/crisis.pdf
  > Resources for Responding to a Crisis at http://smhp.psych.ucla.edu/crisisresp.htm
  > Moving Prevention From the Fringes into the Fabric of School Improvement http://smhp.psych.ucla.edu/publications/24 moving prevention from the fringes into the fabric.pdf
Finally, the focus is on what has been the traditional emphasis of student support services – helping students and families who are identified as needing personal and specialized assistance. Such supports usually require programs and systems to facilitate access of specific students and families to effective health and social services and special assistance on campus and in the community as needed, as well as for career and college planning.

**Examples of Student and Family Assistance**

- Providing support as soon as a need is recognized; doing so in the least disruptive way
  - “Prereferral” interventions in classrooms in the context of “Response to Intervention”
  - Problem solving conferences with parents
  - Open access to school, district, and community support programs
- Referral interventions for students and families with problems
  - Screening, referrals, and follow-up – school-based, school-linked
- Enhancing access to direct interventions for health, mental health, and economic assistance; counseling for career and college
  - School-based, school-linked, and community-based programs
- Follow-up assessment to check whether referrals and services are adequate and effective
- Mechanisms for resource coordination to avoid duplication of and fill gaps in services and enhance effectiveness
  - School-based and linked, feeder family of schools, community-based programs
- Enhancing stakeholder awareness of programs and services
- Involving community providers to fill gaps and augment school resources
- Staff/stakeholder development to enhance effectiveness of student and family assistance systems, programs, and services

In addition to the self-study survey and Quick Finds related to this arena, see

>Student & Family Assistance Programs and Services to Address Barriers to Learning

For a discussion not only of the prototype intervention framework, but also of the policy, operational infrastructure, and systemic change frameworks, see:

>Frameworks for Systemic Transformation of Student and Learning Supports
For more specific examples and mapping and analysis self study surveys for each arena, see the Center’s online resource aid:

*Resource Mapping and Management to Address Barriers to Learning: An Intervention for Systemic Change*

http://smhp.psych.ucla.edu/pdfdocs/resourcemapping/resourcemappingandmanagement.pdf
**Mapping Matrix Combining Continuum and Content Arenas**

Provides the Framework for a Unified & Comprehensive System of Supports
(an Enabling Component)*

<table>

</tbody>
</table>

*Note: Various venues, concepts, and initiatives will fit into several cells of the matrix. Examples include venues such as day care centers, preschools, family centers, and school-based health centers, concepts such as social and emotional learning and development, and initiatives such as positive behavior support, response to interventions, and the coordinated school health program. Most of the work of the considerable variety of personnel who provide student supports also fits into one or more cells.*
Common Core Standards for a Learning Supports Component

The prototype standards are formulated around five areas of concern that confront schools developing a unified and comprehensive system of learning supports:

(1) Framing and Delineating Intervention Functions

(2) Reworking Operational Infrastructure

(3) Enhancing Resource Use

(4) Continuous Capacity Building

(5) Continuous Evaluation and Appropriate Accountability

See the document attached at the end of the handouts for the rationale and the prototype standards, with related quality indicators. This document also is available by clicking on the following link: http://smhp.psych.ucla.edu/pdfdocs/commcore.pdf
What the Student Supports Infrastructure
Looks Like at Most Schools

**Instructional Component**

- Leadership for instruction
  - (Various teams and work groups focused on improving instruction)

**Management/Governance Component**

- Management/Governance Administrators
  - (Various teams and work groups focused on Management and governance)

**School Improvement Team**

**Case-Oriented Mechanisms**

- moderate problems
- severe problems
Example of an Integrated Leadership Infrastructure at the School Level
(Should be paralleled at the district level)

Instructional Component

Leadership for Instruction

(Various teams and work groups focused on improving instruction)

School Improvement Team

Management/Governance Component

Management/Governance Administrators

(Various teams and work groups focused on management and governance)

Learning Supports or Enabling Component

Leadership for Learning Supports*

Learning Supports Leadership Team**

Work groups***

Resource-Oriented Mechanisms

Case-Oriented Mechanisms

*Learning Supports or Enabling Component Leadership consists of an administrator and other advocates/champions with responsibility and accountability for ensuring the vision for the component is not lost. The administrator meets with and provides regular input to the Learning Supports Resource Team.

**A Learning Supports Resource Team ensures component cohesion, integrated implementation, and ongoing development. It meets weekly to guide and monitor daily implementation and development of all programs, services, initiatives, and systems at a school that are concerned with providing learning supports and specialized assistance.

***Ad hoc and standing work groups – Initially, these are the various “teams” that already exist related to various initiatives and programs (e.g., a crisis team) and for processing “cases” (e.g., a student assistance team, an IEP team). Where redundancy exists, work groups can be combined. Others are formed as needed by the Learning Supports Resource Team to address specific concerns. These groups are essential for accomplishing the many tasks associated with such a team’s functions.

For more on this, see

Common Core Standards for a Learning Supports Component

When policy makers introduce another initiative for education reform, the press to implement the new initiative often draws attention away from other essential facets involved in improving and transforming schools. Currently, this is happening with the Common Core State Standards movement.

Efforts to revamp schools cannot afford to marginalize any primary and essential facet of what must take place at schools everyday. Thus, policy must attend to all three of the major interrelated functional arenas that schools pursue day-in and day-out (see below).

Direct Facilitation of Learning (Instructional Component – curriculum/teaching)  Addressing Barriers to Learning/Teaching* (Enabling or Learning Supports Component)

Governance and Resource Management (Management Component)

*Initiatives, programs and services to address barriers often stem from concerns related to safe schools, mandates stemming from compensatory and special education legislation, and various other federal and state programs.

From this three component perspective, it is evident that focusing on curriculum standards certainly is necessary. However, with respect to improving and transforming schools, this limited emphasis needs to expand to fully account for the other two components.

That is why those involved in the Common Core State Standards movement also are discussing model standards for teaching. And that is why now is the time to also move forward in developing common core standards for a unified and comprehensive system to address barriers to learning and teaching and re-engage disconnected students. Standards for a learning supports system are essential to enhancing equity of opportunity for all students to succeed at school and, therefore, are essential to teacher and school success.

By developing interrelated core standards for (1) curriculum and teaching, (2) a learning supports system to address factors that interfere with learning and teaching, and (3) school governance/management, the Common Core State Standards movement will provide a much-needed foundation upon which states, districts, schools, and classrooms can build and succeed.
Rationale for Common Core Learning Supports System Standards

School improvement discussions across the country are standards-based and accountability driven. Efforts to improve instruction (curriculum and teaching) are developing common core state standards. Efforts to address external and internal factors that interfere with learning and teaching need to do the same.

About Interfering Factors

At some time or another, every student brings problems with them that affect their learning and perhaps interfere with the teacher's efforts to teach. In some geographic areas, many youngsters bring a wide range of problems stemming from restricted opportunities associated with poverty and low income, difficult and diverse family circumstances, homeless and foster care status, high rates of mobility, lack of English language skills, violent neighborhoods, problems related to substance abuse, inadequate health care, and lack of enrichment opportunities. Such problems are exacerbated as youngsters internalize the frustrations of confronting barriers and the debilitating effects of performing poorly at school. In some locales, the reality often is that over 50% of students are not succeeding. And, in most schools in these locales, teachers are ill-prepared and poorly supported to address the problems in a potent manner.

Moreover, too many of these students are being inappropriately referred for special education. A unified comprehensive system designed to enable learning can play a major role in stemming the tide of inappropriate referrals. They do this by systemically and directly focusing on factors that interfere with successful teaching and through a unified and comprehensive approach for working with students manifesting moderate-to-severe learning, behavior, and emotional problems.

Examples of Risk-Producing Conditions that Can be Barriers to Learning

*A reciprocal determinist view of behavior recognizes the interplay of environment and person variables.
Current Efforts to Address Barriers to Learning and Teaching Need Revamping

It is easy to say that schools must ensure that all students succeed. If all students came motivationally ready and able to profit from “high standards” curricula, then there would be little problem. But all encompasses those who are experiencing external and internal barriers that interfere with enrolling, attending, and benefitting from what teachers are offering. Thus, providing all students an equal opportunity to succeed requires much more than higher standards and expectations, greater accountability for instruction, and better teaching (and certainly more than increased discipline, reduced school violence, and an end to social promotion).

At present, to address interfering factors, schools have instituted support programs designed to tackle a range of learning, behavior, and emotional problems. Across a district, there are efforts to mitigate and alleviate school adjustment and attendance problems, substance abuse, emotional problems, relationship difficulties, violence, physical and sexual abuse, delinquency, and dropouts.

Some of these programs are provided throughout a school district, others are carried out at—or linked to—targeted schools. Some of the programs are owned and operated by schools; some are managed by community agencies. The interventions may be for all students in a school, for those in specified grades, for those identified as “at risk,” or for those in need of compensatory or special education.

School based and school linked support programs generally focus on responding to crises, early intervention and some forms of treatment. There also may be a focus on prevention and enhancement of healthy development (e.g., promotion of positive physical, social and emotional development) through use of health education, health services, guidance, and so forth.

As is widely recognized, student support programs are terribly fragmented and marginalized in school improvement policy and practice. At some schools, it is commonplace for support staff to function in relative isolation of each other and other stakeholders, with too much of the work oriented to addressing discrete problems and providing specialized services for relatively few students. In some schools, a student identified as at risk for grade retention, dropout, and substance abuse may be the focus of several professionals operating independently of each other. Moreover, the contexts and operational infrastructure for intervention planning and implementation often are limited and makeshift. Many programs and related efforts to prevent and correct problems are assigned space and personnel on an ad hoc basis. Support personnel often must rotate among schools as itinerant staff.

Research indicates that the current deficiencies related to student and learning supports are the result of how such supports have been conceptualized and their marginalization in school policy improvement policy and practice.
Common Core Standards for a System of Learning Supports: Moving Beyond Marginalization and Fragmention

For the Common Core State Standards for curriculum to succeed, schools must have good teaching. And they also must have a unified and comprehensive system for addressing barriers to learning and teaching and re-engaging disconnected students.

For purposes of developing the standards, learning supports are defined as the resources, strategies, and practices that provide physical, social, emotional, and intellectual supports to enable all students to have an equal opportunity for success at school by directly addressing barriers to learning and teaching and by re-engaging disconnected students. Learning supports are designed to enable learning by addressing external and internal factors that interfere with students engaging effectively with instruction.

Establishing standards for a system of learning supports is essential to revamping and revitalizing such supports and making them an integral component of school improvement. The standards will help move learning supports from their current marginalized status by establishing them as a primary priority for school improvement policy and practice. Such standards will guide the development of student and learning supports into a unified and comprehensive component at every school.

Developing common core standards for a system of learning supports provides the foundation for improving standards related to specific subgroups of support staff (e.g., school counselors, psychologists, social workers, nurses, special educators, etc.) and standards related to specific subgroups of students (e.g., those with special needs).

A learning supports system must play out effectively in classrooms and school-wide and must connect effectively with district programs (e.g., federally funded programs) and must outreach to the surrounding community to fill gaps and collaborate in addressing overlapping concerns. Once established at schools, families of schools can enhance effectiveness and achieve economies of scale through collaboration. All this is fundamental for strengthening safety net supports for children and adolescents.

Because it is critical that schools develop a unified and comprehensive system of learning supports, standards need to be conceived in terms of a school level component. School-based standards can readily be adapted for adoption by state, regional, and district educational agencies.

Development of a core learning supports standards in no way minimizes the importance of core curriculum and teaching standards. Every teacher must have the ability and resources to bring a sound curriculum to life and apply strategies that make learning meaningful and carried out in a caring and mutually respectful climate. Appropriately conceived core standards for curriculum and teaching can contribute to all this. At the same time, a standards-based learning supports component at a school provides essential supports for teachers with respect to students who are not benefitting appropriately from offers of good instruction.
The following proposed Common Core Standards for a Learning Supports Component and related quality indicators incorporate input from a variety of resources and professionals across the country and are intended to ensure that the nature and scope of such a system is understood with a view to adoption.

*In reading the standards and quality indicators, remember that:*

- While these standards and indicators focus at the school level, they provide a guide for establishing policy at state, regional, and district levels and can readily be adapted for adoption by state, regional, and district educational agencies.

- The standards and indicators focus on enabling learning by (1) framing and delineating intervention functions, (2) reworking operational infrastructure, (3) enhancing resource use, (4) continuous capacity building, and (5) continuous evaluation and appropriate accountability for system performance and those student outcomes that are directly related to addressing barriers.

- The standards and indicators are designed to establish a *system* that encompasses and benefits all students; thus no specific subgroups of students are identified or singled out.

- The standards embed all student and learning supports programs and services into a *unified component*; thus no specific approaches are identified/singled out.

- The standards stress that all staff have a role to play in addressing barriers to learning and teaching and re-engaging disconnected students; thus the work of specific subgroups of professionals are not identified/singled out.

- As core standards and related indicators for a learning supports *system*, the set provides a base upon which the needs of specific student subgroup, the contributions of various professional specialties and specific programs, and the unique considerations of localities can be built.
Standards for a Unified and Comprehensive System of Learning Supports

The following standards are formulated around five areas of concern that confront schools developing a unified and comprehensive system of learning supports: (1) Framing and Delineating Intervention Functions, (2) Reworking Operational Infrastructure, (3) Enhancing Resource Use, (4) Continuous Capacity Building, and (5) Continuous Evaluation and Appropriate Accountability. (See Appendix for Quality Indicators.)

AREA: FRAMING AND DELINEATING INTERVENTION FUNCTIONS

**Standard 1. Establishment of an overall unifying intervention framework for a comprehensive, multifaceted, and cohesive component for addressing barriers to learning and teaching and re-engaging disconnected students.**

A Learning Supports Component is a systemic approach that is committed to enabling the learning of all students and is fully integrated into the school’s strategic improvement plan. The component is operationalized into a comprehensive, multifaceted, and cohesive intervention framework. One facet of this framework is the continuum delineating the scope of desired intervention (i.e., promoting healthy development and preventing problems, early-after-onset intervention, and treatment of severe and chronic problems). The other facet is a conceptualization that organizes the content arenas for addressing barriers to learning and teaching, with due appreciation for the role played by efforts to promote assets and healthy development. Because of the importance of each of the content arenas, specific standards for each are delineated below:

*Standard 1 addendum: Specific standards for the content arenas of a learning supports component*

While the number and labels for designated content arenas may differ, as Standard 1 states: Schools need to deal with a conceptualization that organizes the “content” arenas for addressing barriers to learning and teaching, with due appreciation for the role played by efforts to promote assets and healthy development. (As one of the quality performance indicators for Standard 1 indicates, rather than a fragmented, “laundry-list” of programs, services, and activities, the learning supports need to be organized into a concise content or “curriculum” framework that categorizes and captures the essence of the multifaceted ways schools need to address barriers to learning at school.)

To illustrate content standards here, content is formulated in this addendum as encompassing six arenas of intervention activity.

>**Standard 1a. Continuous enhancement of regular classroom strategies to enable learning** (e.g., personalizing learning for students with mild-moderate learning and behavior problems and to re-engage those who have become disengaged from learning at school; providing special individual learning accommodations and supports as necessary)
>**Standard 1b.** Continuous enhancement of programs and systems for a full range of transition supports (e.g., assisting students and families as they negotiate hurdles to enrollment, school and grade changes, daily transitions, program transitions, etc.)

>**Standard 1c.** Continuous enhancement of programs and systems to increase and strengthen home and school connections

>**Standard 1d.** Continuous enhancement of programs and systems for responding to, and where feasible, preventing school and personal crises and trauma (including creating a caring and safe learning environment and countering the impact of out-of-school traumatic events)

>**Standard 1e.** Continuous enhancement of programs and systems to increase and strengthen community involvement and support (e.g., outreach to develop greater community involvement and support from a wide range of entities, including enhanced use of volunteers and agency collaborations)

>**Standard 1f.** Continuous enhancement of programs and systems to facilitate student and family access to effective services and special assistance on campus and in the community as needed.

**AREA: REWORKING OPERATIONAL INFRASTRUCTURE**

**Standard 2.** Establishment of an integrated operational infrastructure for the ongoing planning and development of the learning supports component.

Developing and institutionalizing a unified and comprehensive system of learning supports requires mechanisms within a school, among families of schools, at the district level, and between school and community. All mechanisms must be integrated with each other and fully integrated into school improvement efforts and school-community collaborations. The need at all levels is to rework operational infrastructure in ways that support efforts to address barriers to learning in a cohesive manner and to integrate the work with instruction and with the management/governance mechanisms. This requires dedicated administrative and staff leadership (with such leadership fully involved in governance, planning and implementation). Ongoing development and implementation requires work groups focused on school improvement and intervention development functions such as mapping, analysis, and priority setting for resource allocation and integration, system and program development, communication and information management, capacity building, and quality improvement and accountability.

**AREA: ENHANCING RESOURCE USE**

**Standard 3.** Appropriate resource use and allocation for developing, maintaining, and evolving the component.

Use of resources is based on up-to-date gap and outcome analyses and established priorities for improving the component. Resource allocation involves (re)deployment of available funds to achieve priorities. Cost-efficiencies are achieved through common purpose collaborations that integrate systems and weave together learning and student support resources within a school, among families of schools, from centralized district assets, and from various community entities.
AREA: **CONTINUOUS CAPACITY BUILDING**

*Standard 4.* Capacity building for developing, maintaining, and evolving the component.

Capacity building involves enhancing ongoing component and stakeholder development and performance. The work requires allocation of resources to provide effective and efficient mechanisms and personnel to carry out a myriad of capacity building functions. Professional development requires a personalized and differentiated approach designed to address role responsibilities and related accountability and differences in motivation and level of professional development.

AREA: **CONTINUOUS EVALUATION AND APPROPRIATE ACCOUNTABILITY**

*Standard 5.* Formative and summative evaluation and accountability are fully integrated into all planning and implementation of the component.

Formative evaluation provides essential data related to progress in improving component processes and achieving benchmarks and outcomes. In the initial phase of component development, formative evaluation focuses heavily on feedback and benchmarks related to specific developmental tasks, functioning of processes, and immediate outcomes. Formative evaluation is pursued as an ongoing process with an increasing focus on intermediate and then long-range outcomes. Summative data on intermediate outcomes are gathered as soon as the component is operating as an integrated system. Summative data on long-range outcomes are gathered after the component has operated as an integrated system for two years. Accountability indicators should fit each phase of component development. This means the primary focus is on developmental benchmarks in the early phases. When the accountability focus is on student impact, the primary emphasis is on the direct enabling outcomes for students that each arena of the component is designed to accomplish. As these accountability indicators show solid impact, they can be correlated with academic progress to estimate their contribution to academic achievement.

---

**A Note About School Climate and Culture**

A positive *school climate and culture* emerges, in part, from effectively and efficiently addressing barriers to learning and teaching and promoting the well-being of students, their families, and staff. Therefore, school climate is not treated as a separate arena, rather it is an anticipated emergent quality. From this perspective, it becomes an overall quality indicator for the entire school (i.e., for the impact of improvements related to all three components).

Appendix

Quality Indicators for Each Standard

The following indicators reflect standards at the school level. They can be readily adapted for district, regional, state, and federal levels.

---

**Area: Framing and Delineating Intervention Functions**

*Standard 1. Establishment of an overall unifying intervention framework for a comprehensive, multifaceted, and cohesive component for addressing barriers to learning and teaching and re-engaging disconnected students.*

A *Learning Supports Component* is a systemic approach that is committed to enabling the learning of all students and is fully integrated into the school’s strategic improvement plan. The component is operationalized into a comprehensive, multifaceted, and cohesive intervention framework. One facet of this framework is the *continuum* delineating the scope of desired intervention (i.e., promoting healthy development and preventing problems, early-after-onset intervention, and treatment of severe and chronic problems). The other facet is a conceptualization that organizes the *content arenas* for addressing barriers to learning and teaching, with due appreciation for the role played by efforts to promote assets and healthy development.

---

**Quality Indicators for Standard 1:**

(a) The school leadership team has established a policy that commits to development of a unified and comprehensive system for addressing barriers to learning and teaching and re-engaging disconnected students, *and* the policy has been translated into an intervention framework designed to guide development of an Learning Supports Component.

(1) All learning supports are embedded within the intervention continuum and content framework (including all prevention programs, compensatory and special education mandates, and all special initiatives and projects designed to address barriers to learning and teaching).

(2) The continuum of programs and services are organized into a set of *integrated subsystems*. The subsystems range from promoting assets and healthy development, and preventing problems – through responding to problems soon after onset – to providing special assistance for severe and chronic problems. Such a continuum encompasses efforts to enable academic, social, emotional, and physical development and address learning, behavior, and emotional problems at every school and through connections with home and community resources.

(3) Rather than a fragmented, “laundry-list” of programs, services, and activities, the learning supports are organized into a concise content framework that
categorizes and captures the essence of the multifaceted ways schools need to address barriers to learning. For purposes of these standards, content is formulated as encompassing six arenas of intervention activity (see addendum to Standard 1).

(4) The continuum of interventions is combined with the content arenas to create the unifying umbrella framework for the Component. The intervention framework is used as a tool to guide ongoing development of the Component (e.g., mapping and analysis of resources, identifying gaps and redundancies).

(b) The intervention framework has been operationalized and incorporated into the school’s strategic plan for improvement in ways that fully integrate it with the instructional and governance/management components.

(c) The school plan for the Component is being implemented in keeping with established priorities by building on what exists and then moving toward full development in phases.

(d) All interventions (including assessment activity) are based on state of the art best practices for establishing a unified and comprehensive system to address barriers to learning and promote positive development.

(1) Learning supports are applied in all instances where there is need. They are systematically implemented using practices that ensure needs are assessed and addressed in ways that match a student’s motivation as well as capabilities and with as little disruption as feasible of a student's normal involvement at school.

(2) Library, multimedia, and advanced technology resources are used as appropriate to facilitate intervention efforts. This includes the school’s computerized information management system, which should incorporate a broad range of formative and summative data related to the Component’s work with students and families.

(e) School stakeholders express understanding and support for the importance of fully developing the Component.
Because of the importance of each content arena, specific standards for each are delineated below:

**Standard 1 addendum: Specific standards for the content arenas of a learning supports component**

While the number and labels for designated content arenas may differ, as Standard 1 states: Schools need to deal with a conceptualization that organizes the “content” arenas for addressing barriers to learning and teaching, with due appreciation for the role played by efforts to promote assets and healthy development. (As one of the quality performance indicators for Standard 1 indicates, rather than a fragmented, “laundry-list” of programs, services, and activities, the learning supports need to be organized into a concise content or “curriculum” framework that categorizes and captures the essence of the multifaceted ways schools need to address barriers to learning at school.) To illustrate content standards here, content is formulated below as encompassing six arenas of intervention activity.

> **Standard 1a. Continuous enhancement of regular classroom strategies to enable learning** (e.g., personalizing learning for students with mild-moderate learning and behavior problems and to re-engage those who have become disengaged from learning at school; providing special individual learning accommodations and supports as necessary)

**Quality Indicators for Standard 1a:**

(a) Regular support is provided teachers for redesigning classroom practices in ways that enhance teacher capability to prevent and handle problems and reduce need for out of class referrals.

(1) Classroom teachers invite available supports into the classroom to enhance assistance for students (e.g., peer tutors, volunteers, aids trained to work with students-in-need; resource teachers and student support staff frequently work in the classroom as part of the team to enhance classroom practices for enabling learning).

(2) Student support staff jobs have been redesigned to enable them to work more regularly with teachers in classrooms.

(3) Teachers are provided with personalized professional development to enhance their capability to meet the needs of a wider range of individual differences (e.g., creating a Learning Community for teachers; ensuring opportunities to learn through co-teaching, team teaching, collaboration, and mentoring; inservice focused on learning intrinsic motivation concepts and their application to schooling, about response to intervention strategies and accommodations for diversity, about specialized interventions for use as needed, about accessing and referring for special resources and services).
(b) Classroom approaches focus on creating and maintaining a caring and supportive climate through a consistent emphasis on enhancing feelings of competence, self-determination, and relatedness to others at school and reducing threats to such feelings.

(1) Strengths and assets are highlighted, appreciated, and celebrated; natural and curricular opportunities are used to enhance social and emotional development.

(2) Appropriate accommodations are made for students with learning, behavior, and emotional problems and strategies are introduced to connect these students with peers and adults with whom they can develop positive connections.

(3) Among the many practices used to enable learning and enhance positive attitudes toward teachers and school, the classroom provides personalized instruction with small group and independent learning options; expands the range of curricular, instructional, and enrichment options and choices; responds as soon as a problem arises using Response to Intervention strategies that include accommodations, special assistance and learning and student supports as necessary; avoids tying enrichment activities to reinforcement schedules; reduces negative interactions and over-reliance on social control; facilitates access to appropriate referrals and support for follow-through when necessary.
Standard 1b. Continuous enhancement of programs and systems for a full range of transition supports (e.g., assisting students and families as they negotiate hurdles to enrollment, school and grade changes, daily transitions, program transitions, etc.)

Quality Indicators for Standard 1b:

(a) Articulation programs (e.g., supports to negotiate enrollment hurdles; supports for grade-to-grade transitions – new classrooms, new teachers, elementary to middle school, middle to high school, in and out of special education programs) are implemented each year and encompass extended outreach, orientations and follow-up interventions for those who are having difficulty enrolling in and adjusting to the new setting.

(b) School-wide and classroom welcoming and social support programs for newcomers are visible and in operation (e.g., welcoming signs, materials, and initial receptions; peer buddy and mentoring programs for students, families, staff, volunteers).

(c) There are daily transition programs for before school, breaks, lunch, afterschool (including moving from location to location).

(d) As needed, there are summer or intersession programs (e.g., programs for catching-up, maintaining, and moving ahead; recreation and enrichment programs).

(e) School-to-career/higher education transition interventions begin in elementary school and are integrated at every grade through graduation (e.g., counseling, pathway, and mentor programs).

(f) There is broad involvement of stakeholders in planning transition supports (e.g., students, staff, home, police, faith groups, recreation, business, higher education).

(g) Capacity building is provided for all stakeholders involved in enhancing transition programs and activities, with an emphasis on personalized and differentiated professional development.
>**Standard 1c. Continuous enhancement of programs and systems to increase and strengthen home and school connections**

**Quality Indicators for Standard 1c:**

(a) Interventions and an appropriate referral system are available to help address specific support and learning needs of family (e.g., support services for those in the home to assist in addressing basic survival needs and obligations to the children; adult education classes to enhance literacy, job skills, English as a second language, citizenship preparation).

(b) Mechanisms for communication and connecting school and home are regularly used, reach most homes, and are designed to enhance interchange, collaboration, and networking with primary caretakers (e.g., opportunities at school for family networking and mutual support, learning, recreation, enrichment, and for family members to receive special assistance and to volunteer to help; phone calls and/or e-mail from teacher and other staff with good news; frequent and balanced conferences – student-led when feasible; outreach to attract hard-to-reach families – including student dropouts).

(c) Homes are regularly involved in student decision making (e.g., families are encouraged and supported in enhancing capabilities for involvement in program planning and problem-solving).

(d) Regular programs are offered to encourage and enhance capabilities for home support of learning and development (e.g., family literacy; family homework projects; family field trips).

(e) Families are recruited regularly to play a role in strengthening school and community (e.g., volunteers to welcome and support new families and help in various capacities; families representing diverse student subgroups are involved in school governance and school improvement planning).

(f) Capacity building is focused on enhancing home involvement, with an emphasis on personalized and differentiated professional, family, and other stakeholder development.
Standard 1d. Continuous enhancement of programs and systems for responding to, and where feasible, preventing school and personal crises and trauma (including creating a caring and safe learning environment and countering the impact of out-of-school traumatic events)

Quality Indicators for Standard 1d:

(a) School staff work with community members and agency representatives to prepare and integrate plans for response and prevention.

(b) Staff, students, and families have been instructed with respect to response plans and recovery efforts.

(c) All staff are prepared to play a role in crisis response and follow-up.

(d) Immediate assistance is provided in emergencies so students can resume learning.

(e) Follow up care is provided as necessary (e.g., brief and longer-term monitoring).

(f) Crisis prevention programs are in operation (e.g., bullying and harassment abatement programs).

(g) If there are high priority gaps in crisis prevention efforts, efforts are underway to develop interventions to fill the gaps.

(h) Prevention programs are integrated into systems to promote healthy development and prevent problems.

(i) Capacity building is provided for all stakeholders involved in enhancing crisis and trauma response and prevention, with an emphasis on personalized and differentiated professional development keyed to stakeholder diversity and special needs.
Standard 1e. Continuous enhancement of programs and systems to increase and strengthen community involvement and support (e.g., outreach to develop greater community involvement and support from a wide range of entities, including enhanced use of volunteers and agency collaborations)

Quality Indicators for Standard 1e:

(a) Outreach programs are operating on a regular basis to recruit a wide range of community resources (e.g., public and private agencies; colleges and universities; local residents; artists and cultural institutions, businesses and professional organizations; service, volunteer, and faith-based organizations; community policy and decision makers).

(b) Outreach programs encompass strategies for screening, preparing, and maintaining community resource involvement (e.g., mechanisms to orient and welcome, enhance the volunteer pool, maintain current involvements, enhance a sense of community).

(c) Interventions are implemented on a daily basis by the school and in collaboration with community resources to reach out to students and families who don't come to school regularly – including truants and dropouts.

(d) School staff work with community members and agency representatives to connect and integrate school and community efforts to promote child and youth development, well being, and a sense of community.

(e) Capacity building is provided for all stakeholders involved in enhancing community involvement and support (e.g., policies and mechanisms to enhance and sustain school-community involvement, staff/stakeholder development on the value of community involvement, “social marketing”, personalized and differentiated professional development to increase understanding of community programs and resources – including human and social capital).
**Standard 1f. Continuous enhancement of programs and systems to facilitate student and family access to effective services and special assistance on campus and in the community as needed.**

**Quality Indicators for Standard 1f:**

(a) Prior to referral, extra support is provided in the classroom as soon as a need is recognized and is provided in the least disruptive way (e.g., using a comprehensive approach to Response to Intervention strategies that encompasses accommodations and expanded specialized assistance in the classroom; pursuing problem solving conferences with parents; enhancing open access to school, district, and community support programs).

(b) When in-classroom remedies are insufficient, referral and support for developing individual intervention and follow-through plans with students and their families are provided in a timely manner and are based on the carefully amassed data (e.g., using response to intervention data; using special identification/screening processes as necessary; using monitoring data to assess need for further referral access support).

(c) Access to direct interventions for health, mental health, and economic assistance is enhanced through integrated school-based, school-linked, and community-based programs and services.

(d) Systems have been developed and are in operation for checking whether referrals and services are adequate and effective (e.g., monitoring/managing/coordinating individual interventions, sharing information, follow-up assessments).

(e) Mechanisms have been developed and are in operation for resource coordination and integration to avoid duplication, fill gaps, garner economies of scale, and enhance effectiveness (e.g., braiding resources from school-based and linked interveners, feeder pattern/family of schools, community-based programs; linking with community providers to fill gaps).

(f) Mechanisms have been developed and are in operation to enhance stakeholder awareness of programs and services.

(g) Capacity building is provided for all stakeholders involved in enhancing student and family assistance systems, programs, and services, with an emphasis on personalized and differentiated professional development keyed to stakeholder diversity and special needs and mandates.
Area: Reworking Operational Infrastructure

**Standard 2. Establishment of an integrated operational infrastructure for the ongoing planning and development of the learning supports component.**

Developing and institutionalizing a unified and comprehensive system of learning supports requires mechanisms within a school, among families of schools, at the district level, and between school and community. All mechanisms must be integrated with each other and fully integrated into school improvement efforts and school-community collaborations. The need at all levels is to rework operational infrastructure in ways that support efforts to address barriers to learning in a cohesive manner and to integrate the work with instruction and with the management/governance mechanisms. This requires dedicated administrative and staff leadership (with such leadership fully involved in governance, planning and implementation). Ongoing development and implementation requires work groups focused on school improvement and intervention development functions such as mapping, analysis, and priority setting for resource allocation and integration, system and program development, communication and information management, capacity building, and quality improvement and accountability.

**Quality Indicators for Standard 2:**

(a) The school leadership has an operational infrastructure design that fully integrates administrative and staff leadership for a Learning Supports Component into its operational infrastructure and has delineated a plan for the component’s systemic implementation and ongoing development.

(b) There is a designated administrative leader for a Learning Supports Component, and this individual meets regularly with the school’s governance and advisory bodies and staff to represent the component’s concerns in all planning and decision making and interfaces with the learning supports leadership at other local schools and at the district level.

(1) This leader’s job description delineates specific roles, functions, and accountabilities related to systemic planning, capacity building, implementation, evaluation, and sustainability of the component.

(2) This administrative leader is expected to allocate a significant percent of time each day to pursuing functions relevant to the component.

(c) In addition to an administrative leader, a resource-oriented leadership team (e.g., a Learning Supports Leadership Team) for the component is functioning effectively as part of the school’s infrastructure.

(1) This team is responsible for ensuring the vision for the component is not lost and guides the component’s (a) capacity building agenda, (b) development,
implementation, and evaluation, and (c) full integration with the instructional and governance/management components.

(2) The team consists of the administrative leader and staff leaders of major initiatives, projects, programs, and services addressing barriers to learning. It also includes representatives of community resources involved at the school and family members.

(3) The team is a mechanism to ensure appropriate overall use of existing resources (including braiding together available school and community resources). It also works to enhance the pool of resources. To these ends, the team focuses on how all resources for learning and student supports are used at the school with particular emphasis on increasing cohesive and systemic intervention efforts.

(4) The team establishes and monitors standing and ad hoc work groups as needed to ensure appropriate development and implementation of a unified and comprehensive system of learning supports.

(d) Work groups are formed as needed to address specific concerns (e.g., mapping resources, planning for capacity building and social marketing, addressing problems related to case-oriented systems), develop new programs (e.g., welcoming and social support strategies for newcomers to the school), implement special initiatives (e.g., positive behavior support), and so forth.

(1) Work groups usually are facilitated by a member of a Learning Supports Leadership Team who recruits a small group of others from the school and community who are willing and able to help.

(2) Ad hoc work groups take on tasks that can be done over a relatively short time period, and the group disbands once the work is accomplished. Standing work groups focus on defined program areas, pursue current priorities for enhancing intervention in a given arena, and carry out case-oriented functions. For example, standing work groups might be established for the six content arenas of the component and for processing referrals for student study and special education and individual education program planning.

(3) The group facilitator provides regular updates to the resource team on work group progress and brings back feedback from the team.

(e) The component and its various operational mechanisms are fully integrated into the school infrastructure.

(1) There are organizational and operational links within the various groups involved in planning, implementing, capacity building, evaluating, enhancing quality, and sustaining learning supports.

(2) There are links connecting the component with the instructional and governance/management components and with general mechanisms at the school for communication, information management, and problem solving with students, staff, families, and the community.
(3) Routine procedures are in place to ensure all activities are implemented in a manner that coordinates and integrates them with each other.

(f) The school’s computerized information management system, email, website, voicemail and other advanced technology are used to facilitate effective and efficient communication and social marketing of the component and to enhance the general functioning and integration of all infrastructure mechanisms.

(g) A multi-site learning supports resource-oriented leadership mechanism for a “family” of schools (e.g., a Learning Supports Leadership Council) brings together representatives from each participating school’s leadership team for learning supports. (A family of schools are those in the same geographic or catchment area that have shared concerns and among whom some programs and personnel already are or can be shared in strategic ways. An especially important group of schools are those in an elementary, middle, and high school feeder pattern where it is common for a school at each level to interact with students from the same families.)

(1) The multi-site mechanism is effectively ensuring cohesive and equitable deployment of resources, improving connections with neighborhood resources, and enhancing the pooling of resources.

(2) The multi-site mechanism is reducing individual school costs by minimizing redundancy and pursuing strategies to achieve economies of scale.

(h) The multi-site learning supports leadership mechanism is connected to local school-community collaborative mechanisms.

(i) Capacity building is provided for all involved in this facet of the work, with an emphasis on personalized and differentiated professional development keyed to stakeholder diversity and special needs and mandates.
Area: Enhancing Resource Use

**Standard 3. Appropriate resource use and allocation for developing, maintaining, and evolving the component.**

Use of resources is based on up-to-date gap and outcome analyses and established priorities for improving the component. Resource allocation involves (re)deployment of available funds to achieve priorities. Cost-efficiencies are achieved through common purpose collaborations that integrate systems and weave together learning and student support resources within a school, among families of schools, from centralized district assets, and from various community entities.

**Quality Indicators for Standard 3:**

(a) All resources used for learning and student supports are coalesced. The budget for the component weaves together separate school and community funding streams as much as feasible.

(b) The total school budget is allocated equitably in keeping with the timetable for achieving the component’s standards.

(c) The resources allocated for learning supports are mapped and analyzed and the mapping and analysis are routinely updated and communicated to decision maker and other concerned stakeholders.

(d) Priorities are established for improving the Component.

(e) Each year, all school resources for learning supports are allocated and redeployed based on priorities and analyses of effectiveness and cost efficiencies.

(f) Allocations are regularly audited to ensure cost-effectiveness and efficiency.

(g) Centralized district assets are used to facilitate the school’s and the family of schools’ efforts to develop appropriate collaborative arrangements among schools and with community entities to improve braiding and use of resources to fill gaps, enhance effective use of learning supports, and achieve economies of scale.

(1) Collaborative arrangements are in place for each family of schools.

(2) Collaborative arrangements are in place with all appropriate community entities.

(h) Collaborative arrangements are enhancing efforts to weave and use resources to fill gaps, enhanced effectiveness of learning supports, and economies of scale.
**Area: Continuous Capacity Building**

*Standard 4. Capacity building for developing, maintaining, and evolving the component.*

Capacity building involves enhancing ongoing component and stakeholder development and performance. The work requires allocation of resources to provide effective and efficient mechanisms and personnel to carry out a myriad of capacity building functions. Professional development requires a personalized and differentiated approach designed to address role responsibilities and related accountability and differences in motivation and level of professional development.

**Quality Indicators for Standard 4:**

(a) A comprehensive strategic plan has been developed for component capacity building, based on gap analyses and designed to enhance a sense of community and shared ownership.

(b) Appropriate mechanisms are in place, with specified leadership and sufficient staffing to implement the component’s capacity building plan.

(c) All who are responsible for component capacity building have an appropriate background of education and experience (or access to such expertise), including a focus not only on understanding the nature and scope of a unified and comprehensive system of learning supports, but also capability to plan and implement systemic change, organizational development and collaboration. Centralized district assets are used to provide them with ongoing personalized and differentiated professional development.

(d) Sufficient support is provided and procedures are implemented for all facets of capacity building (e.g., infrastructure development and integration; embedding all learning supports into a unified, comprehensive, systemic component; redefining and reframing component leader and line staff roles and functions; developing capability for carrying out new functions; development of diverse stakeholders).

1. Centralized district assets are allocated in ways that directly aid capacity building and effective implementation of the component at the school site and for the family of schools (e.g., feeder pattern).

2. Ongoing personalized professional development is provided for all personnel involved in any aspect of the component and developed and implemented in ways that are consistent with the district's Professional Development Standards and the school’s priorities for enhancing the component’s capabilities.
(3) Time is scheduled for staff to do essential planning for enhancing the component.

(4) Sufficient space, equipment, and supplies are allocated for the component’s work; these are regularly monitored and improvements are made as needed (e.g., facilities used by the component are clean and in good repair, conflicts in scheduling are minimal).

(5) Aggregated and disaggregated data are used in planning capacity building.

(e) Staff recruitment and hiring for the component is designed to employ the most competent personnel available with respect to ensuring the component is effectively developed, maintained, and evolved.

(f) The induction of new learning supports staff includes welcoming and providing orientation, transition supports, and job mentoring.

(g) Component staff are involved in capacity building for teacher's to improve classroom and school-wide approaches for dealing effectively with enrollment and attendance hurdles and with mild-to-moderate behavior, learning, and emotional problems. They also are involved in capacity building for paraprofessionals, aides, out of classroom school staff, and volunteers working in classrooms or with special school projects and services.

(h) Systematic outreach and social marketing are conducted to communicate and connect with all families as Component stakeholders and a wide range of other community stakeholders (not just service providers).

(i) Extramural funds are sought that can help with systemic component development, and special grants that might pull attention away from ongoing systemic development are not pursued.
**Area: Continuous Evaluation and Appropriate Accountability**

**Standard 5.** Formative and summative evaluation and accountability are fully integrated into all planning and implementation of the component.

Formative evaluation provides essential data related to progress in improving component processes and achieving benchmarks and outcomes. In the initial phase of component development, formative evaluation focuses heavily on feedback and benchmarks related to specific developmental tasks, functioning of processes, and immediate outcomes. Formative evaluation is pursued as an ongoing process with an increasing focus on intermediate and then long-range outcomes. Summative data on intermediate outcomes are gathered as soon as the component is operating as an integrated system. Summative data on long-range outcomes are gathered after the component has operated as an integrated system for two years. Accountability indicators should fit each phase of component development. This means the primary focus is on developmental benchmarks in the early phases. When the accountability focus is on student impact, the primary emphasis is on the direct enabling outcomes for students that each arena of the component is designed to accomplish. As these accountability indicators show solid impact, they can be correlated with academic progress to estimate their contribution to academic achievement.

**Quality Indicators for Standard 5:**

(a) Centralized district assets are allocated to support essential component evaluative and accountability activity.

(b) Regular procedures are in place to review the progress with respect to the overall development of the component and its specific arenas of intervention, as well as assessing the fidelity of implementation and initial impact.

(c) Formative information is used to enhance progress in developing the component.

(d) Procedures are in routine use for gathering and reviewing information on the need for specific types of learning supports and for establishing priorities for developing/implementing appropriate interventions. Special attention is paid to the effectiveness of interventions for identifying and addressing enrollment and attendance hurdles and classroom and school-wide learning and behavior problems that are preventable, responding as soon as a problem is manifested for those that are not prevented, and re-engaging students in classroom learning who have become disengaged (including dropouts).
(e) Procedures are in routine use for gathering and reviewing data on how well the component is meeting its objectives and goals; such data are used to inform decisions about capacity building, including infrastructure changes and personnel development.

(f) Accountability indicators are appropriate defined for the current phase of component development.

(g) Primary accountability for component outcomes is focused on the progress of students with respect to the direct enabling outcomes. These are outcomes the component is specifically designed to accomplish. This involves multiple measures of effectiveness in addressing hurdles and barriers (e.g., indicators of: increased attendance; reduced tardies; reduced misbehavior; less bullying and sexual harassment; fewer school adjustment problems after transitions; increased family involvement with child and schooling; fewer inappropriate referrals for specialized assistance; fewer inappropriate referrals for special education; fewer pregnancies; fewer suspensions; fewer dropouts; enhanced access to school and community supports; enhanced effectiveness related to response and prevention of crises and trauma; reduced student and staff mobility).

(h) When the component is well-established, accountability expands to include a focus on how well the direct enabling outcomes correlate with enhanced academic achievement.

(i) All data are disaggregated to clarify impact as related to critical subgroup differences (e.g., pervasiveness, severity, and chronicity of identified problems).

(j) All data are reviewed for making decisions about enhancement and renewal.
